

LESSON PLAN

# of students	30	Subject	Health and Wellness	Grade Level	8
Length of Class Period	50 minutes	Unit of Study	Healthy Relationships	Lesson #	1
Your Name	Emma Ly				

IDENTIFY DESIRED RESULTS

Learner Outcomes from the Program of Studies What are the SPECIFIC outcomes to be addressed in this series of lessons?
<u>Subject Area:</u> Grade 8 Health and Life Skills Wellness Choices: Students will make responsible and informed choices to maintain health and to promote safety for self and others. Personal Health ● W-8.1: Students will examine the relationships between choices and resulting consequences; e.g., how choosing to smoke affects how one looks, feels and performs Relationships Choices: Students will develop effective interpersonal skills that demonstrate responsibility, respect and caring in order to establish and maintain healthy interactions. Interactions ● R-8.6: Students will describe and provide examples of ethical behaviour in relationships; e.g., integrity Group Roles and Processes ● R-8.8: Students will describe and explain the positive and negative aspects of conformity and dissent as they relate to other individuals in a group or on a team
Health and Well-being Considerations
During this lesson, students will have the opportunity to discuss the worksheet with their peers. This will help reduce stress and allow students who need extra support to receive it from their peers. Additionally, if at any

point a student is feeling unwell or needs a break, they can silently sit at their desk or do a quick movement break (walk around the classroom).

Objective in student-friendly language What will students understand/experience/appreciate as a result of this lesson?	Assessment Strategies What will I accept as evidence of learning/development? Have I employed formative assessment? Do I make use of prior assessments in this lesson?
By the end of this lesson, students will be able to: - Describe why certain actions may be difficult due to peer pressure - Discuss the positives and negatives of conformity and dissent - Provide examples of ethical behaviour - Understand how peer pressure can influence their choices and explore ways to respond in a healthy and respectful way	This is the first lesson in a series of two, so it primarily focuses on formative assessment and determining what students currently know. Formative: - Teacher and student discussions while walking through the classroom - Verbal feedback and questioning - Completed true/false peer pressure worksheet - Class discussion centered around peer pressure
Resources (Everyone) What materials/resources/technology will be required?	Personalization/Differentiation How will you attend to the needs of ALL learners in this lesson?
Resources - Whiteboard - Whiteboard markers - True/false peer pressure worksheet Technology: - No technology is required for this lesson Additional Notes: - Students will need a pencil to complete the worksheet.	Universal Interventions (all students): - Provide clear verbal instructions and examples to support understanding of peer pressure and the worksheet. - Encourage peer discussion to promote collaboration and reduce anxiety around participation. Targeted Interventions (small groups of students): - Provide sentence starters or guiding questions to help students express their thoughts. - Allow students to discuss in small groups before sharing with the class to build confidence.

	Individual Interventions (specific students): ● Offer the option to respond in writing instead of speaking during class discussion. ● Provide one-on-one support and additional processing time as needed.

LESSON PLAN SEQUENCE – LESSON 1

Introduction and Hook How will you ACTIVATE prior knowledge, ENGAGE them in the lesson, and how does this lesson connect to prior lessons?		
The lesson begins with a brief overview of the activities in the class. Students will be reminded of the previous lesson where they briefly introduced the concept of peer pressure.		
Learning/Activity Sequence How will students EXPLORE, EXPLAIN, ELABORATE, and/or EVALUATE their understanding of the outcomes? How will you scaffold the learning activities to ensure students are remembering, understanding, applying, analyzing, evaluating, cooperating, and/or creating?		
Teacher activities and instructional strategies to meet the objectives and student learning needs	Learning activities and student engagement strategies that explore and demonstrate understanding of the objectives	Approx. time
The teacher will begin the class with a brief overview of today's activities. The class will consist of a true/false peer pressure worksheet, followed by a class discussion.	Students will sit silently at their desks and listen to instructions.	5 minutes
The teacher will go around the classroom and hand out the worksheet.	Students will answer true/false on the worksheet. They may discuss their answers with their peers.	10-15 minutes
Once all students have completed the worksheet, the teacher will ask them to circle which of the statements they find most difficult to do. For example, students may feel that it's most difficult to stand up for a friend against	Students will spend time to reflect on the true/false statements and circle which ones they find the most difficult to do.	5 minutes

the group opinion, and would circle that question to indicate it.		
The teacher will engage the students in a class discussion around why students find certain actions difficult to do. They will discuss the positives and negatives of conforming to the group's ideals, and how peer pressure plays a role in each scenario.	As a class, students will discuss which statements they find most difficult, and why. They may talk about their personal lived experiences, or just generally what they believe.	20 minutes
The teacher will discuss peer pressure and summarize the key ideas from the discussion.	Students will sit and listen silently. They may raise their hand if they want to give input or introduce a new idea.	5 minutes
Conclusion How will you ensure students walk away with a sense of understanding the PURPOSE of the lesson and its IMPORTANCE to their learning? What should the next lesson cover or review based on this lesson?		
To ensure students understand the purpose and value of today's lesson, the class will conclude with a brief summary of key ideas surrounding peer pressure. The teacher will highlight both the negatives of conformity (e.g., making unsafe or unhealthy decisions, not thinking independently) and the potential positives (e.g., feeling included, building connections with others). Students will be asked to reflect on one strategy they can use when facing peer pressure, reinforcing their ability to apply what they have learned. The teacher will emphasize the importance of making ethical choices in healthy relationships and discuss the potential consequences of different decisions. The lesson will end with a reminder that while fitting in can feel important, students should prioritize their values, safety, and well-being. Next Lesson Focus: The next lesson will build on this understanding by having students act out peer pressure scenarios. They will analyze and reflect on these situations to better recognize what peer pressure looks like and develop strategies to respond effectively.
